# Got Muck?

Excess organic sediment (muck) can cause soft lake bottoms, unpleasant odors, and increased weed growth along your shoreline.

**PLM MD (Muck Digestion) Pellets** naturally stimulate beneficial bacteria that break down organic buildup on the lake or pond bottom. Regular use can help improve shoreline conditions and support overall water quality.

- Easy monthly application (when water is above 55F)
- Safe for treated water when used as directed
- Ideal for residential shoreline areas
- Commercial applications available for larger areas

Available in 10 lb. and 30 lb. buckets or 50 lb. bags.

If you're interested in reducing muck along your shoreline this season, please contact our office for pricing or additional information.

## 2026 TENTATIVE TREATMENT SCHEDULE

**White Birch Lakes Association has been scheduled for the week of:**

Date	Description	Date	Description
		7/20/2026	Survey, Weed & Algae Treatment
5/18/2026	Survey, optional Algae Treatment	8/17/2026	AVAS Survey, Weed & Algae Treatment
6/15/2026	Weed & Algae Treatment	9/7/2026	End of Year Survey

EGLE permitting restrictions, national holidays, and weather conditions may affect the timing of treatments during the 2026 season. PLM schedules each waterbody treatment in coordination with your lake association, lake board, or residents. The treatment schedule is approximate. Please watch your shoreline for 8.5 11-inch yellow or green signs, which will indicate the treatment date, the products used, and any restrictions on water use for swimming, irrigation, or other activities.
